DETAILED ACTION

1. This communication is responsive to Amendment filed 09/13/2005 and 08/03/2005.
2. Claims 1 and 3-5 are pending in this application. Claims 1 and 3-5 are independent claims. In Amendment, claim 2 is cancelled. This Office Action is made non-final after a RCE filed 09/13/2005.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 1, the limitation "a sampling pulse for processing...of the second-order bandpass IIR digital filter" is unclear how the limitation that sampling pulse is required to set to a frequency six times as large as a central frequency is relevant to the IIR filter as recited in the preamble. Claims 3-5 have the same rejection.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Art Unit: 2193

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1 and 3 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

7. Claims 1 and 3 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a substantially asserted utility or a well established utility.

Re claim 1, a preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. Thus, claim 1 only discloses a series of coefficients and a sampling pulse set at 6 times the central frequency. The limitations do not provide any structure or function of the filter recited in the preamble. Therefore, the claim points to only no-functional descriptive material, which is only an abstract idea. Claim 3 is rejected for the reason set forth in connection with claim 1.

Allowable Subject Matter

8. Claims 4-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

9. Applicant's arguments with respect to claims 1 and 3-5 have been considered but are moot in view of the new ground(s) of rejection.
